ROUND 4:-GOOGLEYNES

INTERN EXPERIENCE TALK

BRACH :- Electrical and Electronics Engineering

INTERNSHIP SEASON :-FULL TIME EMPLOYMENT

DESCRIPTION OF ROLE :- SDE

JOB LOCATION :- BANGALORE

SKILLS LEARNED :-

DESCRIPTION OF ONLINE TEST :-

The online test was completely based on data structures and algorithms with questions primarily focussing on arrays, strings, segment trees and dynamic programming.

DESCRIPTION OF INTERVIEW :-

My overall experience of the technical interviews was pretty good. The questions asked were completely based on DSA. The difficulty of the questions was between medium to hard level with some deep follow-up questions. Round 1 - It was a graph question based on Dijkstra's algorithm. Round 2 - 3 independent questions were asked based on merge sort, priority queue and trie respectively. Round 3 - It was a recursion based question turning into dynamic programming with the follow-up involving graph concept using DSU.

DESCRIPTION OF HR ROUND

Google takes it HR round in the name of Googleness round which is nothing but answering to some situation based questions for judging your communication and behavioural skills.
