(offline from CSE labs).
Round 2- Technical
Interview (online)

INTERN EXPERIENCE TALK

BRACH :- Electrical and Electronics Engineering

INTERNSHIP SEASON :- PPO

DESCRIPTION OF ROLE :- SDE

INTERN LOCATION :- Hyderabad

SKILLS LEARNED :-

DESCRIPTION OF ONLINE TEST :-

2 DSA questions of medium level difficulty were asked. A set of behavioural questions based on Amazon leadership principles.(This is the crucial part of their assessment do not neglect this)

DESCRIPTION OF INTERVIEW :-

I don't remember the exact questions but both the questions were on binary search. The duration of the interview was an hour. They expected me to solve both the questions completely (every test case should be passed). The first question was of medium difficulty and the second one was hard based on leetcode standards. I made sure to cover the edge cases as well as tried to provide the most optimal solution before he had a chance to ask me those questions.
