COMPANY REQUIREMENTS

ELIGIBLE BRANCHES

**BTech all
except
Biotech**

CG CUTOFF

7.0+ CGPA

SELECTION PROCEDURE

**Online Test, 2 Technical
Interviews and one HR
round**

INTERN EXPERIENCE TALK

BRACH :- Electrical and Electronics Engineering

INTERNSHIP SEASON :- 2024-25

DESCRIPTION OF ROLE :- SDE

Title of the role says Member Technical Staff, not sure what my role will be, maybe there will be more clarity after joining full-time employment offer

INTERN LOCATION :- Bangalore/ Hyderabad

SKILLS LEARNED :-

DESCRIPTION OF ONLINE TEST :-

Test had 30 MCQs and One coding questions, to be done in 90 mins. MCQs contained questions of Aptitude and reasoning, English , DBMS, OS and DSA(mostly on BST and AVL trees). Coding question everyone got a different one, some got disjoint set questions, some PPL got trees question and I got Bit manipulation question.

DESCRIPTION OF INTERVIEW :-

In first tech round I was asked around 7 to 8 DSA questions covering topics like two pointers, greedy, binary search, monotonic stack, graph algos, then some puzzles and last discussion about my internship experience and on what I worked on. It lasted for 1 hour 30 mins.

In second round he started by basic DBMS theory questions, some OOPs questions (basic pillars, implement a singleton class in c++...note there is no singleton keyword in c++). Some basic pagination questions in OS. This was just 30 mins round.

Pure HR round, with questions like what difficult you faced in which project and how you overcame them. Have you worked in a team ever before, your strengths and weakness, trending technical topics like AI and IOT. He asked me if I was trying to learn these things also , i said till now I have not tried them, but they do fascinate me but as of now all my time was dedicated to CG, DSA, DBMS ,Oops and web development, in future surely I will learn them. Chat gpt all the standard HR questions and be prepared.
